

## Thanks Tri-fold Card

### Requirements –

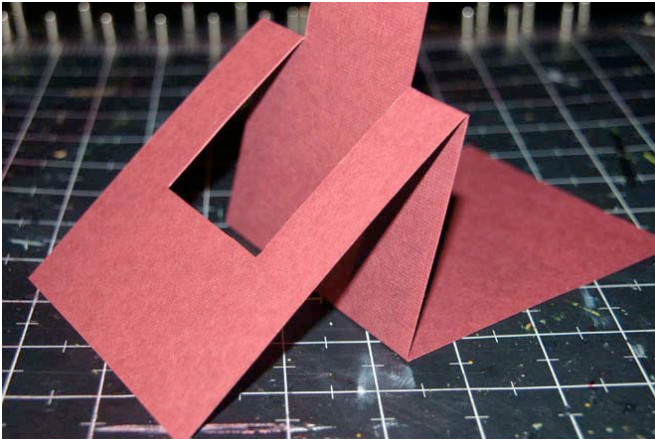

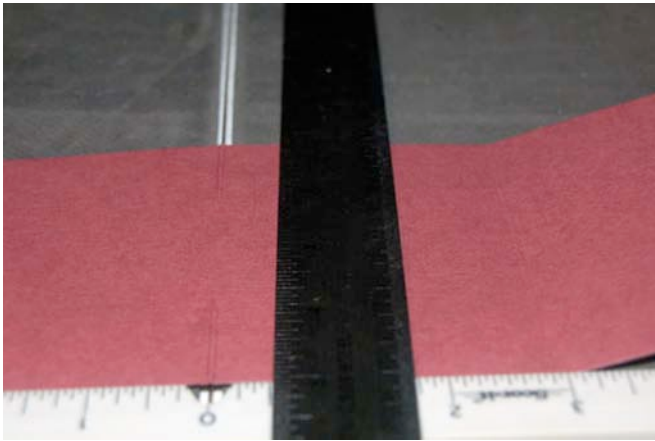

- Strip of card measuring 4 inches by 30 inches
- Chipboard Letters
- Flower
- White gel pen

- Rub-ons

### Instructions –

1. Begin by marking score marks using the scor-it board. The first should be 4 \_ inches in from the left side edge. Turn the card over.

2. Use the scor-it board to mark a score line 4 \_ inches in from the right side HOWEVER do not score all the way along. Score down from the top approximately 1 inch and up from the bottom approximately 1 inch. See template above.

3. Use a soft lead and mark out a rectangle from the inner edges of the last score. I marked mine at 4 inches wide by 2 \_ inches long. Cut along the mark to pop out the rectangular section. See template to confirm where to cut.

4. Finally, fold along score lines and decorate. I chose to add layers of decorative rub-on images from a rub-on sheet manufactured by Blue eye designs. Add flower and the word 'happy' using chipboard letters.
